

1. Connect your iPhone/iPad and computer on the same Wi-Fi network.
2. Open the Finder and press command+K keys simultaneously and enter the **blue** URL address displayed on top of the screen

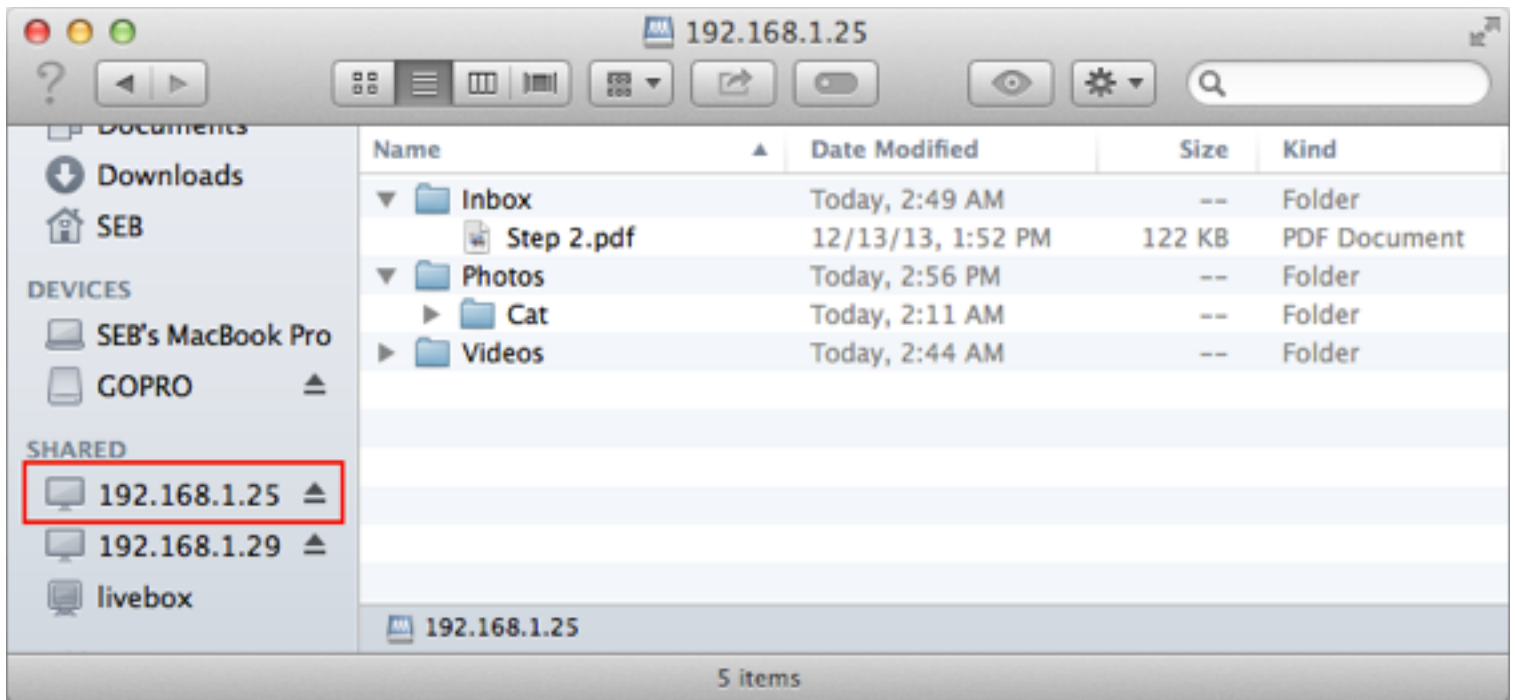

3. Hit the connect button and eventually enter your computer password.

4. Use your iPhone/iPad as an external flash drive and transfer files seamlessly between your iDevice and your computer: create folders, move and copy files...

Once you have done transferring your files, just go back to your files on your iPhone/iPad to disconnect it from your computer.

If you have issues connecting your computer to your iPhone/iPad, send us an email at support@seb-appstore.com.
