

## Organize

Create Folders to organize your videos and musics

## Import

Import videos from your Camera Roll

## Share

Turn your device into a wifi external hard drive. You share the folder in which you turn the wifi hard drive ON. The wifi hard drive is ready when its HTTP address is displayed on top of the page.

Turn your device into an internet HTTP server. You share the folder in which you turn the Internet Server ON. The internet server is ready when its addresses displayed on the bottom of the of the page.

When you connect your device to a computer, you shall keep the Wifi Hard Drive/Internet Server page displayed for the connection to be active; if you close the Wifi Hard Drive/Internet Server page, the connection will be terminated.

## Lock App

Define a passcode to lock the app and keep your data private
