1. Connect your iPhone/iPad and computer on the same Wi-Fi network.
2. Click on "Start" and then select "Computer".

3. Click on "Map network drive"

4. Enter the **blue** URL displayed on top of the screen, and click on "Finish" to connect your computer to your iPhone/iPad

5. Use your iPhone/iPad as an external flash drive and transfer files seamlessly between your iDevice and your computer: create folders, move and copy files…
Once you have done transferring your files, just go back to your files on your iPhone/iPad to disconnect it from your computer.

If you have issues connecting your computer to your iPhone/iPad, send us an email at support@seb-appstore.com
